Holy See Communiqué

On Monday, 31 May 2021, the World Health Assembly adopted, by consensus, Resolution *Participation of the Holy See in the World Health Organization* presented by Italy, which formalizes the participation of the Holy See in the work of the World Health Organization as a non-Member State Observer. This decision reflects the relationship that the Holy See has continuously maintained with this Organization since 1953 and it bears witness to the commitment of the family of nations in addressing, through dialogue and international solidarity, the global health challenges that afflict humanity.
